## Volume 63 Numbers 1–2

| AUTHORS | | ARTICLES |
|---|---|---|
| M Steślika, R Kucharczyk and R Błaszczyszyn | 1 | Preface |
| **Adsorption and Desorption** | | |
| F Gołek and W J Sobolewski | 3 | Thresholds of ESD for LiF thin layers |
| T Hrnčíř, V Matolín and V Nehasil | 7 | AES and TDS study of CO interaction with Rh layers on Al substrate |
| V Johánek, N Tsud, V Matolín and I Stará | 15 | TPD and XPS study of the CO adsorption on transition-SP metal systems: Pd and Al |
| M Krawczyk | 23 | Oxygen adsorption on binary $Co_{50}Pd_{50}$ alloy surfaces |
| L Markowski | 29 | Desorption of doubly excited autoionizing Li from LiF/Si(1 0 0) under electron bombardment |
| E Rówiński | 37 | Observation and interpretation of the Auger spectrum from the chemisorption during reactive implantation of nitrogen on the surface of a TiNi alloy |
| **Atomic Structure and Topography** | | |
| G Antczak, T E Madey, M Błaszczyszyn and R Błaszczyszyn | 43 | Faceting of Pt-covered W, Pt-covered Ir, and Pd-covered Mo field emitter tips |
| A Ciszewski, Z Szczudło and S M Zuber | 53 | Interaction of $H_2$ with Ti and Hf crystals grown on W field emitters |
| E Dobierzewska-Mozrzymas, P Biegański and G Szymczak | 59 | Microstructures of island metal films—the computer simulations and statistical description |
| N T Dubyk, Ya B Losovyj, I V Ketsman and L I Ivankiv | 67 | Correlation between the atomic and electronic structures in Dy/Mo(1 1 2) and Gd/Mo(1 1 2) adsystems |
| W Kamiński, B Stankiewicz and L Jurczyszyn | 75 | Computations of STM images of zinc-blende GaN(0 0 1) surface |
| V Nehasil and Y Lykhach | 83 | Characterisation of Rh films deposited onto $Al_2O_3$ substrate by means of electron spectroscopy |
| J M Rogowska and M Maciejewski | 91 | Kinetic Monte Carlo study of fractal growth with edge diffusion and reversible aggregation on a bcc(110) surface |
| N Spiridis, J Haber and J Korecki | 99 | STM studies of Au nano-clusters on $TiO_2$(110) |
| R Zdyb, M Stróżak and M Jałochowski | 107 | Gold-induced faceting on Si(5 3 3) surface studied by RHEED |

PII: S0042-207X(01)00403-1

## Diffusion

T Biernat and A M Dąbrowski 113 Two-process diffusion of titanium on the (111) tungsten plane by the current fluctuation method in FEM

A Bukaluk 119 Influence of depth resolution on the interdiffusion data in thin film bilayer and multilayer Ag/Pd structures

M A Załuska-Kotur, A Łusakowski, S Krukowski, Z Romanowski and Ł A Turski 127 Chemical surface diffusion analysis by the time evolution of density profiles. The Monte Carlo simulations

## Electronic Structure

M Brajczewska, C Henriques and C Fiolhais 135 Dependence of metal surface properties on the valence-electron density in the stabilized jellium model

Z Klusek 139 Scanning tunneling spectroscopy study of the edge surface states on oxygen-etched graphite surface with the presence of liquid crystal steps

Z Klusek, P Kowalczyk and P Byszewski 145 Investigations of electronic structure of capped carbon nanotubes by scanning tunneling spectroscopy

V U Nazarov and S Nishigaki 151 Inelastic electron scattering at metal surfaces: the role of elastic scattering

B Stankiewicz 157 Charge shift as a criterion of correctness of the surface electronic structure LCAO calculations

K Warda, L Wojtczak, D Baldomir, M Pereiro and J E Arias 163 Laser influence on magnetoresistance

## Low-dimensional Systems

B Djafari-Rouhani, D Bria, E H El Boudouti, A Nougaoui and V R Velasco 171 Guided acoustic waves of an adlayer deposited on a superlattice

B Djafari-Rouhani, E H El Boudouti, A Akjouj, L Dobrzynski, J O Vasseur, A Mir, N Fettouhi and J Zemmouri 177 Surface states in one-dimensional photonic band gap structures

W Jaskólski, M Bosek, M Bylicki and J Planelles 185 Resonance states of quantum dots with $D^0$ centers in a magnetic field

W Jaskólski, R Oszwałdowski and G W Bryant 191 On boundary condition-induced states in low-dimensional semiconductor structures

A Mir, A Akjouj, E H El Boudouti, B Djafari-Rouhani and L Dobrzynski 197 Large omnidirectional band gaps and selective transmission in one-dimensional multilayer photonic structures

M Stęślicka, R Kucharczyk and A Kaczyński 205 Superlattice with two $\delta$-type defects: electronic structure and density of states

## Semiconductors

A Bukaluk, F Firszt, S Łęgowski, H Męczyńska and J Szatkowski 211 Auger electron spectroscopy and photoluminescence investigations of $Cd_{1-x}Mg_xSe$ crystals

S Kuźmiński and K Pater 219 Surface states on the $Cd_{1-x}Fe_xTe$ surfaces

M Miczek, B Adamowicz, J Szuber and H Hasegawa 223 Computer analysis of photoluminescence efficiency at InP surface with U-shaped surface state continuum

Y Ould-Metidji, L Bideux, V Matolin, B Gruzza and C Robert 229 Nitridation of InP(100) surface studied by AES and EELS spectroscopies

A A Wronkowska, A Wronkowski, H Arwin, F Firszt, S Łęgowski, H Męczyńska and J Szatkowski 233 Characterisation of $Cd_{1-x}Mg_xSe$ solid solutions by spectroscopic ellipsometry

## Surface Reactions

B Białek and Z M Stępień 241 Formation of cobalt hydrides in a high electric field

R Duś and E Nowicka 249 Hydrogen distribution between the surface and the bulk of thin nickel film at low temperatures

P J Godowski, J Onsgaard, S V Hoffmann and S Quist-Sckerl 257 The coadsorption of hydrogen and carbon dioxide versus adsorption of formic acid on Cs-dosed Cu(110)

T Kobiela and R Duś 267 STM/AFM studies of the catalytic reaction of oxygen with hydrogen on the surface of thin palladium film

Ya B Losovyj, I V Ketsman, P P Kostrobij and Yu Suchorski 277 Catalytic CO oxidation on a dysprosium-promoted Pt(111) surface

Y Lykhach, J Pešička and V Nehasil 283 Electron spectroscopy study of metal particle-gas molecule interaction

M Zawadzki, W Mista and L Kępiński 291 Metal-support effects of platinum supported on zinc aluminate

## Thin Films and Interfaces

B Bergues, J Lekki, A Budkowski, P Cyganik, M Lekka, A Bernasik, J Rysz and Z Postawa 297 Phase decomposition in polymer blend films cast on homogeneous substrates modified by self-assembled monolayers

P Cyganik, A Bernasik, A Budkowski, B Bergues, K Kowalski, J Rysz, J Lekki, M Lekka and Z Postawa 307 Phase decomposition in polymer blend films cast on substrates patterned with self-assembled monolayers

L Calvo-Barrio, A Pérez-Rodríguez, J Alvarez-Garcia, A Romano-Rodríguez, B Barcones, J R Morante, K Siemer, I Luck, R Klenk and R Scheer 315 Combined in-depth scanning Auger microscopy and Raman scattering characterisation of $CuInS_2$ polycrystalline films

F L Castillo Alvarado, S Machowski and A Urbaniak-Kucharczyk 323 Localised modes of elementary excitations in the system of two ferromagnetic layers separated by a nonmagnetic spacer

B Handke, J Haber, T Ślęzak, M Kubik and J Korecki 331 Magnesium interdiffusion and surface oxidation in magnetite epitaxial films grown on MgO(100)

M Kubik, T Ślęzak, M Przybylski, W Karaś and J Korecki 337 Interface modeling in Cr/Fe/Cr sandwiches studied by CEMS

P Mazur 345 Photoemission spectroscopy of CuCl/LiBr interface

W Soszka, N-T H Kim-Ngan, D Sitko, G Jagło, J Korecki and B Handke 349 The surface metal-insulator phase transition of MBE (100) magnetite thin film

## Other Topics

E Czerwosz, D Vouagner, P Dłużewski, K Zawada and J P Girardeau-Montaut 355 Work function and electron emission from nanocrystalline Pd films

P Kościelniak, S Kaszczyszyn and J Szuber 361 A new type of electron energy analyzer based on three coaxial cylindrical electrodes for Auger electron spectroscopy

V V Levitin, O L Garin, V K Yatsenko and S V Loskutov 367 On structural sensibility of work function

A Sulyok, G Gergely, M Menyhard, J Toth, D Varga, L Kover, Z Berenyi, B Lesiak and A Kosinski 371 Recoil effect in carbon structures and polymers

L Wojtczak, I Zasada and T Rychtelska 377 Lattice vibrations in diffuse LEED investigations

## Volume 63 Number 3

| AUTHORS | | ARTICLES |
|---|---|---|
| H Kersten, H Deutsch, H Steffen, G M W Kroesen and R Hippler | 385 | The energy balance at substrate surfaces during plasma processing |
| S Kumar, C M S Rauthan, P N Dixit, K M K Srivatsa, M Y Khan and R Bhattacharyya | 433 | Versatile microwave PECVD technique for deposition of DLC and other ordered carbon nanostructures |
| M A M Seyam | 441 | Optical and electrical properties of indium monosulfide (InS) thin films |
| K K Hirakuri, T Kobayashi, E Nakamura, N Mutsukura, G Friedbacher and Y Machi | 449 | Influence of the methane concentration on HF–CVD diamond under atmospheric pressure |
| | I | VACUUM DIARY |

## Volume 63 Number 4

| AUTHORS | | ARTICLES |
|---|---|---|
| | 455 | Editorial |
| W Słówko | 457 | Secondary electron detector with a micro-porous plate for environmental SEM |
| W Słówko and W Drzazga | 463 | Detection of secondary electrons in a retarding electric field |
| E Lunarska, O Czerniajewa and A Nakonieczny | 469 | Effect of plasma nitriding and TiN plasma deposition on stress corrosion cracking of 40HM steel |
| J Piekoszewski, Z Werner and W Szymczyk | 475 | Application of high intensity pulsed ion and plasma beams in modification of materials |
| A D Pogrebnjak, A G Lebed and Yu F Ivanov | 483 | Modification of single crystal stainless steel structure (Fe–Cr–Ni–Mn) by high-power ion beam |
| Z Synowiec | 487 | Ion bombardment in surface passivation of GaAs |
| A N Akimov, L A Vlasukova, Yu A Bumai and K S Gorupa | 491 | Activation of Si implanted in GaAs at high intensity As co-implantation |
| A F Komarov, F F Komarov, P Żukowski, Cz Karwat and A A Kamarou | 495 | Simulation of two-beam ion implantation in the multilayer and multicomponent targets |
| A P Kobzev, E A Kravtcov, L N Romashev, A V Semerikov and V V Ustinov | 501 | Using of the high-grade layered structures for the demonstration of the depth resolution of the RBS method |
| J Hereć, J Sielanko and Z Wroński | 507 | Monte Carlo simulation of the concentration distribution of sputtered cathode material in glow discharge plasma |
| M Rabiński and K Zdunek | 513 | Investigation of current sheet dynamics in the IPD accelerator |
| J Baranowska, K Szczeciński and M Wysiecki | 517 | Cathode sputtering as a pre-treatment for gas nitriding |
| E Richter, J Piekoszewski, F Prokert, J Stanisławski, L Waliś and E Wieser | 523 | Alloying of silicon on Ti6Al4V using high intensity pulsed plasma beams |
| J Martan | 529 | The influence of the interaction potential on the fractal dimension of the collision cascade |
| Z Wroński | 535 | Plasma of the cathode zone of glow discharges and its interaction with the cathode surface |

| | | |
|---|---|---|
| M Andreyev and V Anishchik | 541 | Changes in the structure and properties of TiN coatings irradiated with Ti ions of moderate energies |
| C Szmytkowski and E Ptasińska-Denga | 545 | Fluorination effects in electron-scattering processes—comparative study |
| C Szmytkowski and P Możejko | 549 | Spectrometer for the study of electron-assisted processes |
| J Dąbek and L Michalak | 555 | Size-dependent fragmentation of carbon dioxide clusters |
| T Fiegele, V Grill, S Matt, M Lezius, G Hanel, M Probst, P Scheier, K Becker, H Deutsch, O Echt, A Stamatovic and T D Märk | 561 | Electron and ion high-resolution interaction studies using sector field mass spectrometry: propane a case study |
| V A Skuratov, N Dinu, I V Antonova and V I Obodnikov | 571 | Hundred MeV heavy ion irradiation effect on boron diffusion in Si |
| F F Komarov, A S Kamyshan, A M Mironov, A E Lagutin and I S Martynov | 577 | Formation of device isolation in GaAs with polyenergetic ion implantation |
| V B Odzhaev, O N Jankovsky, I A Karpovich, J Partyka and P Węgierek | 581 | Electrical properties of polyethylene modified by multistage ion implantation |
| B Słowiński and A Adawi | 585 | Changes of properties of selected glasses irradiated with gamma rays and neutrons: a short overview |
| J Ruzicka, A Hrmo, L Krupa, S Saro, V Fajnor, K Jesenak, L Kuchta, H Geissel, H Irnich, C Kozhuharov, A Magel, G Munzenberg, F Nickel, C Scheidenberger, H-I Schott, W Schwab, Th Stohlker, B Voss, V P Zrelov, P V Zrelov and E D Lapchik | 591 | Vavilov–Cherenkov radiation emitted by heavy ions near the threshold |
| J Wilk, G Przybylski and Z W Kowalski | 597 | Ion-sputter-modification of metal targets |
| Z W Kowalski | 603 | Ion sputter induced surface morphology—biomedical implications |
| A Kamarou, A Komarov and P Zukowski | 609 | Gettering of metal impurities to cavities formed by hydrogen and helium implantation in silicon |
| W Oleszkiewicz and P Romiszowski | 613 | Monte Carlo modeling of the IBAD growth of the optical films |
| L Thomé and F Garrido | 619 | Application of ion beams to nuclear waste issues: evaluation of nuclear ceramics |
| R E Hurley and H S Gamble | 627 | Some current issues in the use and application of ionised plasma for silicon semiconductor processing research |
| P D Townsend and D E Hole | 641 | Optical responses of ion implanted nanoparticles in silica and glass |
| Ya V Fattakhov, M F Galyautdinov, T N L'vova and I B Khaibullin | 649 | In situ investigation of phase transitions of implanted silicon at powerful light irradiation |
| F Komarov, P Gaiduk and A Kamarou | 657 | Damage evolution and track formation in crystalline InP and GaAs during swift Kr and Xe ion irradiation |
| C Karwat | 665 | The effect of nitrogen ion irradiation on the operational temperature regime of working surfaces of electrical contacts |
| J Jagielski, A Piatkowska, W Matz, E Richter, G Gawlik and A Turos | 671 | Structural and micromechanical properties of ion-beam mixed tungsten-on-steel system |
| P Konarski, I Iwanejko, A Mierzejewska and R Diduszko | 679 | Morphology of working environment microparticles |
| P Konarski, I Iwanejko, A Mierzejewska and A Wymysłowski | 685 | Ion sputtering of microparticles in SIMS depth profile analysis |
| J Narojczyk, Z Werner and J Piekoszewski | 691 | Analysis of the wear process of nitrogen implanted HSS stamping dies |

| | | |
|---|---|---|
| G Gawlik, R Ratajczak, A Turos, J Jagielski, S Bedell and W L Lanford | 697 | Hydrogen-ion implantation in GaAs |
| Z Werner, J Piekoszewski and W Szymczyk | 701 | Generation of high-intensity pulsed ion and plasma beams for material processing |
| A Stec | 709 | Transfer function model of a planar magnetron for control purposes |
| D Krupa, J Baszkiewicz, J Kozubowski, A Barcz, J Sobczak, A Biliński and B Rajchel | 715 | The influence of calcium and/or phosphorus ion implantation on the structure and corrosion resistance of titanium |
| B Jaroszewicz, W Słysz, M Węgrzecki, K Domański, R Grodecki, G Gawlik, A Kudła, H Wrzesińska, M Górska and P Grabiec | 721 | Investigation of ion implantation for fabrication of p–n junctions with modified silicon surface for photovoltaic devices |
| A Melnikov, M Rusetsky, V Varichenko, V Skuratov, A Zaitsev, W R Fahrner, J Partyka and P Węgierek | 725 | The influence of high energy krypton ion irradiation on optical and electronic properties of diamond |
| P. Budzyński, P. Tarkowski and P. Penkaa | 731 | Influence of nitrogen ion implantation on tribological properties of tool steel NC10 |
| P Budzyński, P Tarkowski, E Jartych and A P Kobzev | 737 | Evolution of mechanical properties in tool steel implanted with high energy nitrogen ions |
| J Hereć, J Sielanko, J Filiks and M Sowa | 743 | Low energy $Cs^+$ and $Cl^-$ ion implantation into Si—SIMS investigations |
| T Tsvetkova, N Tzenov, M Tzolov, D Dimova-Malinovska, G J Adriaenssens and H Pattyn | 749 | Optical properties and chemical structure of ion implanted a-SiC : H |
| M Kulik, F F Komarov and D Mączka | 755 | RBS and channeling studies of GaAs implanted with $In^+$ ions |
| M Kulik, J Hereć and J Romanek | 761 | RBS and ellipsometric studies of near surface GaAs ion implanted layers |
| W Wierzchowski, K Wieteska, A Turos, W Graeff and G Gawlik | 767 | Synchrotron investigation of strain profiles in the implanted semiconductors |
